

EIS000010

RECEIVED

Dear Ms. Dixon,

AUG 17 1999

4... I am adding my dismay to that of many others that the Federal Government is continuing to "gram" down our throats the dump at Yucca Mountain.

1... How many studies do the taxpayers have to be charged for before you admit this is not a proper place for a dump?

2 Why is Nevada singled out to house other States Garbage? The other states that benefitted from this mess should be totally responsible for housing the waste.

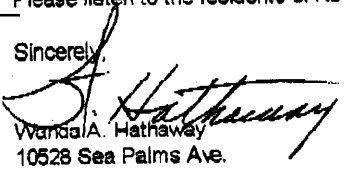

3 Nevada has been "dumped" on for years. The test site is a perfect example. We were lied to that the testing was not harmful to Nevadans or others down-wind from the tests. Well we all know this was not true and many apparently have lost their lives as a result. How about the mess that was created in Hanford, WA. That probably won't ever be cleaned up even 10,000 years from now.

1 cont. I'm sure the cost of your Yucca Mountain testing now runs in the billions and it appears to continue against all odds that this is the place to house the waste.

I am an very unhappy taxpayer that has watched Washington politicians waste money as if there was no end to the supply for another "boon-doggle."

4 cont. Please listen to the residents of Nevada, "we do not want anymore nuclear waste in our State."

Sincerely,

Wanda A. Hathaway
